

Supply List for Electric Quilt Classes

Laptop computer with EQ8 (or EQ7) installed prior to class. The EQ program needs to be activated, so installation must be done before class. If you have not used EQ on your laptop for at least 60 days prior to class, you will need to open EQ on your laptop a day or two before class. Make sure your laptop is connected to the internet and that you can open EQ on your computer. EQ requires that the validation be updated every 60 days. This is important if the student wants the program to work in class.

Power supply for the laptop

External mouse that is compatible with the laptop (it's easier to use than the touch pad)

Spare battery if mouse is wireless

Mouse pad

Power cord for laptop (the battery will not last through class)

Note-taking materials

Optional: User manual for reference

Instructor: Nancy Mahoney
